

**Australian designed all-in-one
Battery Energy Storage System
with Clean Energy Council certification.**

Whispr-7

All-in-one Residential Battery Energy Storage System (BESS)

Introducing the Whispr-7, PowerPlus Energy's new residential all-in-one solution.

The platform makes use of world leading CATL battery cells with a unique silent running inverter. Our renowned local support team are on hand to support the Whispr-7.

7kW / 13.37 kWh system

Single phase

VPP ready

PowerPlus™

Whispr-7

Designed by **Australians**,
for **Australian** homes.

Silent 7kW
hybrid inverter

Wide range of
connections for energy
input and output

Streamlined
stackable BESS with
7kW inverter and
13.37kWh of storage

3.3kWh battery pack
utilising premium
CATL cells.

ADVANCED USER INTERFACE

The Whispr-7 comes complete with an advanced user interface for mobile and desktop apps giving complete BESS and fleet overview, with detailed insights into energy consumption, generation, and system control.

INHERENTLY SAFE

PowerPlus Energy utilises LFP chemistry that are naturally stable, highly resistant to overheating or fire, and designed to offer safe, reliable performance in everyday use.

CLEAN ENERGY COUNCIL APPROVED

The PowerPlus Energy Whispr-7 is a CEC listed product, approved for on-grid installation across Australia.

FUTURE VPP READY

Future proof solution ready for energy trading and virtual power plant applications, backed by an AI-based app to optimise value for the end user and minimise energy costs.

SIMPLICITY AND INTEGRATION

A simple solution that allows a rapid installation and easy integration to solar systems with smartphone app configuration.

NO COMPROMISE ON PERFORMANCE

Comes with a full 5+5 year warranty, backed by local support.
